Masai School

Mukul Saini

Full Stack Web Developer

Professional Summary

Dynamic and innovative Full Stack Web Developer skilled in JavaScript and the MERN stack (MongoDB, Express.js, React.js, Node.js). Expertise in creating seamless full-stack applications, optimizing server-side APIs, and enhancing database efficiency. Demonstrated proficiency in Generative AI and quickly adapting to new technologies.

Projects

Blinkit Live Demo Link Github Repo Link

JavaScript CSS3 HTML5

Responsive Web Design Git React Node.js

Redux MongoDB Express.js RESTful APIs

- Created a Blinkit-inspired grocery delivery platform with a responsive UI.
- Implemented optimized search, infinite scrolling, and a dynamic cart system.
- Managed global state with Redux and smooth UI interactions using React Hot Toast & SweetAlert2.
- Utilized Tailwind CSS for modern responsive styling and React Router for seamless navigation.
- Integrated REST APIs with Axios to ensure smooth client-server communication.

Image Bot Live Demo Link Github Repo Link

JavaScript CSS3 HTML5 React

Responsive Web Design Express.js Node.js

MongoDB

- Collaborated with stakeholders to define functional requirements for the AI-powered image bot, translating them into scalable web applications.
- Designed and developed server-side APIs using Node.js and Express.js to support image generation and user authentication.
- Implemented and maintained frontend components with React.js, ensuring seamless user interaction with the image bot.
- Integrated Razorpay to enable seamless premium feature payments, providing users a secure payment experience.
